Claim Rejections - 35 USC § 102

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mohri (6, 515,669) in view of Clapper et al. (Pub. No. US 2003/0025721 A1).

Regarding claims 1-10, Mohri discloses a wearable device (Fig. 19A and Fig. 19B), which has the some function of claim 1-10 of claimed invention, input device. The host PC receives the information from this operation input device and can estimate the hand shape or perform 3D model computer graphics (CG) display of the hand like virtual-reality (VR) display. And analysis the movement of the finger or hand and determine which command or letter is type (input analysis means 4).

However Mohri fails to disclose switch the sensor from a keyboard mode to a mouse mode. Clapper discloses a mode control switch for switching from keyboard mode to pointer mode. This mode control switch may be incorporated into the digitizer glove 12, the character grid 22 (shown as character 47 in FIG. 5), or both. Toggling the mode control switch allows the digitizer glove 12 to alternately function as a mouse and a keyboard character selector [0048].

It would have been obvious to a person of ordinary skill in the art at the time of invention was made to modify the teachings of Mohri in view of Clapper in order to an

operation on the basis of a shape, spatial position, posture, and motion of a hand of an operator.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
